SECTION 2.01 Initiation of Water and Sanitary Sewer Connections. No service shall be established or re-established until such fees are paid. All service connections are subject to the provisions of the District's Rules and Regulations and all other rules, regulations, and policies of the District.

SECTION 2.02 Policies Governing Initial Connections.

A. Certification of System. Connections shall not be made to the District's System or portions of the System until the District's engineer has certified that the System or applicable portion thereof is operable.

B. Availability of Access/Obstructions. By application for connection to the District's System, the Customer shall be deemed to be granting to the District and its representatives a right of ingress and egress to and from the meter or point of service for such installation, maintenance and repair as the District, in its judgment, may deem reasonably necessary. The Customer shall also be deemed to be granting to the District and its representatives a right of ingress and egress to the Customer's property, including the exterior of the Customer's premises, for the purpose of performing the inspections and completing the Customer Service Inspection Certifications required by the District's Rules and Regulations. Taps and connections will not be made when, in the opinion of the District's engineer or Operator, the work area is obstructed by building materials or other debris or the work area is not completed or finished to grade. When sidewalks, driveways or other improvements have been constructed prior to application for service, such application shall be construed and accepted as the Customer's waiver of a claim for any damages to such improvements resulting from the reasonable actions of the District's Operator in installation of the connection.

SECTION 2.03 Connections by District Operator. All connections to the District's sewer system shall be made in accordance with the District's Rules and Regulations. No person except the District's Operator or his authorized agent shall be permitted to tap or make any connection to the mains or distribution piping of the District's water system, except for emergency firefighting purposes, or make any repairs or additions to or alterations in any meter, box, tap, pipe, cock or other fixture connected with the water service or any manhole, main, trunk or appurtenance of the District's sanitary sewer system, unless otherwise specified by the Board of Directors of the District. A copy of the Standard Operating Procedures for connection to the District's system and inspection of such connection is attached to this Order as **Appendix "B"** and incorporated herein for all purposes.

SECTION 2.04 Inspections and Fees.

A. Sewer Inspection and Fees. Sewer connections and house service lines shall be inspected by the District's Operator for compliance with the Rules and Regulations. An inspection fee of \$50.00 shall be charged for all connections. Installations which fail to conform at any time to the Rules and Regulations shall be disconnected. Any Customer whose connection is disconnected for such failure shall be notified as to the basis for such disconnection. After noted deficiencies have been corrected, a reinspection shall be made upon payment to the District of a reinspection fee of \$50.00. If subsequent reinspections are required before the sewer connection and service lines are in compliance with the Rules and Regulations, a reinspection fee of \$50.00 shall be charged for each such reinspection.

B. Customer Service Inspection Fees. The District's Operator shall perform the inspection and complete the Customer Service Inspection Certification required by Article III of the Rules and Regulation. A fee of \$55.00 shall be charged for such inspection and certification.

C. Final Builder Inspection and Fees. Prior to initiation of construction by a builder a pre-building inspection shall be made by the District's Operator. A fee of \$50.00 shall be charged by the District for such pre-building inspection. Upon receipt of instruction from a builder to transfer an account to an initial Customer, the District's Operator shall make a post-building inspection of the property and make note of the condition of all District facilities. The District's Operator will repair any damaged District facilities, and the builder will be held responsible for all costs incurred. A fee of \$50.00 shall be charged by the District to cover the cost of such inspection. The pre-building and post-building inspection fees will be collected at the time the tap fee is paid.

D. Backflow Prevention Assembly Certification and Inspection Fee. The Customer shall be responsible for having an annual inspection of any backflow prevention assemblies that will require annual Test Reports as required by Section 3.06 of the District's Rules and Regulations. Inspection of backflow prevention assemblies installed prior to the initial Customer Service Inspection shall be included as part of the Customer Service Inspection. An additional Customer Service Inspection will be required for a Material Change to the Plumbing System.

SECTION 2.05 Builder's Deposit. Each builder of a residence, commercial building or other structure shall, at the time a request for a water tap is made, pay a deposit of \$500.00 for the first lot for which a water tap has been requested and \$100.00 for each additional lot thereafter, up to a maximum deposit of \$2,000. The deposit shall be refunded within ninety (90) days after the builder certifies the sale of its last residence, commercial building or other structure within the District, less any amounts forfeited as provided herein. The District shall deduct from the deposit the cost to repair any damage caused to the District's property by the builder or the builder's employees, contractors, subcontractors or agents and shall deduct any delinquent water and sewer service bills of the builder. In the event any amounts are so deducted from the builder's deposit, it will be incumbent on the builder to reinstate the original amount of the deposit, and failure to do so will result in the suspension of any additional water taps for the builder.

SECTION 2.06 Temporary Water Service.

A. Temporary Connections. The District's Operator shall be authorized to make a temporary connection to any fire hydrant or flushing valve upon request for temporary water service. All temporary service shall be metered and billed to the temporary Customer as provided herein. shall provide a minimum security deposit of \$750.00, but not more than \$1,000, with such determination to be made by the District's Operator depending on the length of time temporary service is required and estimated amount of water to be used. The deposit shall be made by cashier's check or money order payable to the District. The deposit shall be used by the District to secure the payment for temporary water supplied by the District, the installation fee, and the cost of repair of any damages caused by the temporary Customer. The balance of the security deposit, if any, shall be refunded after disconnection from the District's System.

C. Fees and Rates. A fee of \$50.00 for costs of installation, plus the cost of the metered water, shall be charged for temporary water service. Discharges requiring a trap and sampling well include, but are not limited to, grease, oil, sand, or flammable waste. Other discharges requiring a trap and sampling well shall be determined by the Engineer or Operator on a case-by-case basis based on the Engineer's or Operator's conclusion that the discharge in question will harm the District's facilities if allowed to enter the District's system.
